2011 Wedding Price Sheet

Michelle and Tim are husband and wife professional photographers often referred to as the dynamic duo.

Working closely with you, we tailor our photography to your perfect day. We then focus on capturing ALL of the "Key Moments" and inherent emotion. We believe that every second of your exceptional day has the potential to be preserved in an album that may very well be your first family heirloom!

Our complimentary teamwork allows us to photograph the unique perspective of both the bride and grooms preparation. Even after your wedding day we hand process each image together. We then print them and create your artistic White Glove First Edition coffee table album.

- 📷 Our photography style is 80% photojournalism and 20% formal portraiture.
- 📷 Prints are available in Color, Black & White, Sepia or Special Order
- 📷 All of our packages include two photographers or a photographer and an assistant.
- 📷 Selected photographs are printed with archival media that is rated fade resistant for 100+ years when framed behind glass.

For those brides that had there family and friends photograph their wedding, we have an album design service available!

The **White Glove** album is a truly magnificent bound-book that displays your wedding day moments in a fashionable, state-of-the-art presentation. This album permits the display of multiple images on a page or a single image across two open pages. Thus, a 13x13 album will contain images 13-inches high and 26-inches wide! Furthermore, images are typically presented in a collage-like style.

(See <http://www.wgbooks.com>) Cover windows are optional.

* \$500 reserves your wedding day.

*New orders will be available 3 – 4 months after purchase.

* Online viewing of proof images at www.ErskinePhoto.com usually in 2 weeks. Password protection is available upon request.

*One Proof CD of all the images is included in each package and will be used to place orders. Proof CD's consist of images that have not been processed. Due to copyright and file sizes the images are converted to low-resolution JPEGs suitable for viewing on PC and for E-mail, but typically not suitable for printing.
